

BLACK HOLES IN DENSE STAR CLUSTERS
Aspen Center for Physics
2015 Aspen Winter Conference January 17-22, 2015

TITLE: Radio Continuum Surveys for Black Holes in Globular Clusters

SPEAKER: Jay Strader (MSU)

I will discuss ongoing radio continuum surveys for stellar-mass and intermediate-mass black holes in Milky Way globular clusters, including new stellar-mass black hole candidates and results from followup observations of previously discovered objects.
